HORMONE OPTIMIZATION PROGRAM

🌿 250/month

Reclaim your vitality. Redefine your wellness.

Experience a science-based approach to restoring balance and optimizing how you feel, look, and perform. Our personalized hormone optimization program is designed to support energy, focus, mood, metabolism, and longevity—tailored entirely to you.

Your program includes:

- Comprehensive one-on-one consultations with our clinical team each month
- Advanced lab testing and detailed analysis of hormone, metabolic, and nutrient levels
- Body composition assessments to track fat loss, muscle gain, and overall progress
- Customized treatment plan with precisely dosed bioidentical hormones and targeted supplements

Member Exclusives:

- 20% off peptide therapy, IV therapy, and NAD+/Niagen® infusions
- Special provider-only pricing on prescription medications
- Ongoing clinical support and dose optimization to ensure lasting results

Note: Cost of medications is not included. Most commonly prescribed bioidentical hormones—such as testosterone, estrogen, progesterone, and DHEA—average around \$50 per month, depending on formulation and dosage.

MEDICAL WEIGHT LOSS PROGRAM

🌿 150/month

Achieve lasting results with a personalized, clinically guided plan. Each program includes monthly one-on-one consultations, lab testing, and body composition analysis. Prescription weight loss medications are tailored to your individual needs, and we provide ongoing monitoring, including personalized plans for tapering off when appropriate. Members also receive 20% off peptides, IV therapy, and NAD+/Niagen® treatments.

Note: Cost of medications is not included. For reference, pricing details are listed inside.

PEPTIDE THERAPY

🌿 starting at 300/month

Activate your body's natural ability to heal, repair, and thrive.

Peptides are short chains of amino acids that act as powerful messengers—telling your cells how to function optimally. As natural peptide production declines with age, supplementation helps restore communication at the cellular level, reigniting energy, regeneration, and longevity from within.

Our peptide protocols are precision-formulated to enhance recovery, metabolism, immune defense, cognitive function, and sexual vitality—helping you look, feel, and perform at your best.

Benefits include:

- Elevated energy, focus, and metabolism
- Improved muscle tone, recovery, and body composition
- Deeper, more restorative sleep
- Enhanced mood and cognitive clarity
- Reduced inflammation and stronger immunity
- Healthier skin, hair, and sexual vitality

Some of the Peptides offered at IntegraMed
Wellness include:

Sermorelin • CJC-1295/Ipamorelin • BPC-157
Thymosin Alpha-1 • GHK-Cu • Tesamorelin
Elamipretide (SS-31) • Cibinetide (ARA-290)
Bremelanotide (PT-141) • Hexarelin • Omnitrope

Note: Pricing reflects cost per vial. Dosage and frequency are individualized for each patient. Every program is customized and carefully monitored to ensure safety, balance, and results you can feel.

🌿 WEIGHT MANAGEMENT MEDICATIONS

Semaglutide	300/mo
